

Assignment:

1. Create a directory structure on Linux:

- Create a folder named projects.

```
mkdir projects
```

- Inside projects, create subfolders: week1, week2.

- ```
cd projects
mkdir week1 week2
```

### 2. Use Linux commands to:

- Create an empty file named hello.txt inside week1.

- ```
cd week1  
touch hello.txt
```

- Copy hello.txt to week2 and rename it to hello_copy.txt.

- ```
cp hello.txt week2/hello_copy.txt
```

- Delete the original hello.txt from week1.

- ```
rm hello.txt
```

3. Write a short paragraph in a text file (about_me.txt) using a command-line text editor vim, describing your motivation for learning Node.js.

```
touch about_me.txt  
vim about_me.txt
```
